Collins Street Specialist Centre — Dr Andrea Phatouros ****Specialist Orthodontist**** BDSc (WA) · MDSc — Orthodontics (WA) · FRACDS

Clinical expertise

Dr Andrea Phatouros is a specialist orthodontist at Collins Street Specialist Centre with more than three decades of clinical experience and a strong record across both specialist practice and orthodontic education. Throughout her career she has combined rigorous clinical orthodontic care with a genuine commitment to teaching — at undergraduate and postgraduate levels — which keeps her work grounded in current evidence and evolving technique.

Dr Phatouros treats patients across the full range of presentations and age groups. Her clinical experience covers:

- Comprehensive orthodontic treatment for children, adolescents, and adults - Traditional metal and ceramic braces - Clear aligner therapy (Invisalign and alternatives) - Lingual orthodontics - Complex malocclusion, including skeletal discrepancies and significant crowding - Orthodontic treatment involving missing teeth, implants, or restorative dental work - Multidisciplinary care coordinated with periodontic, prosthodontic, and surgical colleagues

The depth of clinical judgement that comes from decades of specialist practice is genuinely useful for patients with complex or previously unresolved concerns. It shapes not just what treatment is recommended, but the reasoning behind it and what to expect at each stage.

Training pathway

Dr Phatouros completed her Bachelor of Dental Science (BDSc) at the University of Western Australia in 1991, followed by Fellowship of the Royal Australasian College of Dental Surgeons (FRACDS) in 1994.

She then completed specialist orthodontic training at the University of Western Australia, graduating with a Master of Dental Science in Orthodontics (MDSc Orth) in 2005. Her clinical performance during that training was recognised with the **Postgraduate Clinical Award for Excellence in Clinical Presentation**, awarded for exceptional technical and clinical standard during postgraduate study.

Her training followed the formal academic and clinical requirements of specialist orthodontic practice in Australia — from foundational dental science through to advanced specialist qualification, with independent recognition of clinical excellence along the way.

Teaching contributions

Dr Phatouros has made a sustained contribution to orthodontic education in Australia:

- Previously responsible for the **first-year undergraduate dental programme** at the University of Western Australia, introducing dental students to orthodontics at the foundational level - Continued teaching across **both undergraduate and postgraduate programmes** in Perth prior to relocating to Melbourne

This commitment to education reflects a genuine belief that clinical excellence is sustained through the ongoing exchange of knowledge, in the consulting room and in formal teaching settings alike. Clinicians who teach tend to stay current — it comes with the territory.

For referring dentists, this background offers practical reassurance: Dr Phatouros understands the clinical reasoning behind a referral and approaches collaborative care with the same rigour she brings to teaching.

Professional memberships

- Fellow, Royal Australasian College of Dental Surgeons (FRACDS) - Australian Dental Association (ADA)

At Collins Street Specialist Centre

Dr Phatouros practises within the Orthodontics service at Collins Street Specialist Centre, located at Level 12 & Tower, Manchester Unity Building, 220 Collins Street, Melbourne CBD.

Her clinical experience and teaching background make her well suited to patients with complex presentations — including those who have had previous orthodontic treatment elsewhere that didn't achieve the intended outcome, and those whose orthodontic needs intersect with restorative or surgical planning.

****What to expect:**** A specialist orthodontic consultation with Dr Phatouros involves a thorough assessment of your dental and skeletal presentation, a clear explanation of the available treatment options, and an honest discussion of likely outcomes, timeframes, and any relevant considerations. The aim is for patients to leave with a clear understanding of their situation and a confident sense of the path forward.

Patients are welcome to self-refer or attend with a referral from their general dentist. All specialist credentials are independently verifiable through the Australian Health Practitioner Regulation Agency (AHPRA) public register.
