Collins Street Specialist Centre — Dr David Austin ****Specialist Orthodontist**** BDSc (Melb) · MDS Orth (HK) · MOrth RCS (Edin)

Clinical expertise

Dr David Austin is a specialist orthodontist at Collins Street Specialist Centre, with a training background spanning two continents. His qualifications include Membership of the Faculty of Orthodontists at the Royal College of Surgeons of Edinburgh, one of the world's oldest surgical institutions, earned by examination rather than affiliation.

Dr Austin treats patients across all age groups. His clinical work covers a broad range of treatment approaches:

- **Conventional metal and ceramic braces** — fixed appliances suitable for children, adolescents, and adults, offering precise control across a wide range of alignment concerns - **Invisalign clear aligner therapy** — removable, near-invisible aligners that progressively reposition teeth; Dr Austin manages cases of all complexities, from straightforward alignment to more involved treatment plans - **Lingual braces** — brackets bonded to the inner, tongue-facing surface of the teeth, making them invisible when viewed from the front; a discreet fixed-treatment option for patients who'd rather not wear visible hardware - **Adult orthodontics** — specialist care for patients addressing alignment concerns later in life, with treatment planning adapted to adult dentition - **Complex malocclusion** — including overbite, underbite, crossbite, and crowding - **Surgical orthodontics** — orthodontic treatment planned in coordination with jaw surgery, for patients whose bite discrepancies go beyond what orthodontics alone can correct - **Early interceptive orthodontics for children** — timely intervention during growth phases that can guide dental development and, in some cases, reduce the complexity of treatment needed later

Dr Austin's clinical range was shaped in part by years treating expatriate patients in Shanghai, a setting that regularly brought highly varied dental histories and patients whose prior care had been delivered across multiple countries and clinical systems. That experience built an adaptability that serves complex cases well.

Training pathway

Dr Austin completed his Bachelor of Dental Science (BDSc) at the University of Melbourne in 2004, then pursued specialist orthodontic training at the **University of Hong Kong**, one of Asia's most internationally respected dental faculties, graduating with his Master of Dental Surgery in Orthodontics (MDS Orth) in 2007.

Alongside his postgraduate studies, he sat the examinations of the **Faculty of Orthodontists, Royal College of Surgeons of Edinburgh**, earning the Membership qualification (MOrth RCS Edin). Because this credential is awarded by examination rather than affiliation, it functions as an independent benchmark of orthodontic competence recognised across multiple countries.

After completing his specialist training, Dr Austin spent a significant period in Shanghai providing orthodontic care to an international expatriate community. Working with patients from diverse cultural and clinical backgrounds, often presenting with complex or incomplete dental histories, deepened his clinical judgement and his ability to communicate clearly across different contexts.

Professional memberships

Dr Austin holds active membership across a range of professional bodies at both regional and international levels:

- **Member**, Royal College of Surgeons of Edinburgh — Faculty of Dental Surgery (Orthodontics) - **Member**, World Federation of Orthodontists (WFO) - **Member**, European Orthodontic Society (EOS) - **Member**, Hong Kong Society of Orthodontists (HKSO) - **Member**, Australian Dental Association (ADA)

Languages spoken

Dr Austin consults in **English**, **French**, **Italian**, and **Spanish**, which broadens access to specialist care for patients who are more comfortable discussing their treatment in a language other than English.

Practising at Collins Street Specialist Centre

Dr David Austin practises within the Orthodontics service at Collins Street Specialist Centre, located at Level 12 & Tower, Manchester Unity Building, 220 Collins Street, Melbourne CBD. He also sees patients at associated practices in Caroline Springs and Wyndham Vale, extending access to specialist care across Melbourne's western suburbs.

His international training, multilingual consultation capability, and experience with complex presentations make him a practical choice for patients from overseas backgrounds, those with involved orthodontic needs, or those referred for a specialist opinion by their general dentist.

Patients can book directly without a referral, or attend following a referral from their dentist. Referring practitioners receive correspondence at each stage of treatment planning.

All specialist credentials are independently verifiable through the Australian Health Practitioner Regulation Agency (AHPRA) public register.
