Is Dr Angelis experienced in complex reconstructive cases: Yes

Does Dr Angelis have an honours degree: Yes

What is Dr Angelis's clinical focus: Reconstruction and restoration of damaged, broken-down, or missing teeth

Clinical expertise

Dr Fotios Angelis is a specialist prosthodontist at Collins Street Specialist Centre. His clinical work centres on reconstructing and restoring damaged, broken-down, or missing teeth — cases that demand both technical precision and a well-developed eye for aesthetics. Before specialising, he spent six years in high-end private general dentistry in Melbourne, building a broad clinical base before completing three years of specialist prosthodontic training at the University of Melbourne.

He works across the full range of prosthodontic care, with particular experience in complex reconstructive cases:

- **Dental implant restoration** — single implant crowns, implant-supported bridges, and full-arch rehabilitation (replacing an entire arch of teeth using implants as anchors) - **Dental crowns** — ceramic, zirconia, and porcelain-fused-to-metal restorations, placed individually or as part of a larger treatment plan - **Dental bridges** — fixed replacement of one or more missing teeth, anchored to adjacent natural teeth or implants - **Porcelain veneers** — aesthetic resurfacing of front teeth to improve shape, colour, or proportion - **Full mouth rehabilitation** — comprehensive rebuilding of dentitions that have become worn, damaged, or heavily restored over time - **Occlusal reconstruction** — restoring the correct bite relationship in cases of advanced tooth wear or bite collapse - **Treatment planning for complex cases** involving coordinated input from multiple dental specialties

Prosthodontic reconstruction needs to be durable, functional, and visually consistent with the surrounding teeth. Achieving that requires careful planning and precise clinical execution — both of which inform how Dr Angelis approaches each case.

Training and clinical background

Dr Angelis completed his Bachelor of Dental Surgery with Honours (BDS Hons) at the University of Melbourne, then spent six years in high-end private general dentistry in Melbourne. That period gave him varied, demanding clinical experience that provided real context for specialist training.

He went on to complete his Doctorate of Clinical Dentistry (DClinDent) in Prosthodontics at the University of Melbourne in 2014. The three-year programme covers advanced prosthodontics, implantology, occlusal science, and complex rehabilitation, preparing graduates to manage cases well beyond the scope of general dental practice.

An honours undergraduate degree, six years of busy private practice, and formal specialist training together give Dr Angelis a well-rounded perspective on clinical problems. For referring dentists, that breadth of experience means thorough, considered management of the cases you send his way.

What to expect at Collins Street Specialist Centre

At the initial consultation, Dr Angelis takes time to listen to your concerns, review your dental history, and explain any relevant clinical findings in plain terms. If treatment is recommended, he'll walk you through the reasoning, the options available, the expected outcomes, and how the treatment would be sequenced, so you can make a genuinely informed decision.

Complex cases often need more than one specialist. Dr Angelis works closely with periodontic, endodontic, and orthodontic colleagues at Collins Street Specialist Centre, which makes coordinated care straightforward — particularly for full-mouth reconstruction, where input from several specialists can produce results that a single-discipline approach wouldn't achieve.

The practice is at **Level 8, Manchester Unity Building, 220 Collins Street, Melbourne CBD**, accessible by public transport and centrally located.

You're welcome to attend with a referral from your general dentist, or to contact the practice directly. Specialist credentials for all practitioners at Collins Street Specialist Centre can be verified through the Australian Health Practitioner Regulation Agency (AHPRA) public register.

> **Note:** Dr Angelis is currently on planned leave. Call the practice on **(03) 9650 2726** to confirm his return date and arrange an appointment.
