Collins Street Specialist Centre — Dr Steven Smith, Specialist Orthodontist ****Specialist Orthodontist**** BDS (Hons) (Qld) · MDSc — Orthodontics (Qld)

Clinical expertise

Dr Steven Smith is a specialist orthodontist at Collins Street Specialist Centre, trained entirely at the University of Queensland — one of Australia's most respected dental schools. He holds an honours undergraduate dental degree and a specialist Master's in orthodontics, both from UQ, giving him a thorough grounding in the discipline from the start of his career.

His scope of practice covers orthodontic care across all age groups. Patients and referring clinicians can expect a comprehensive, evidence-informed approach to assessment and treatment, including:

- Comprehensive orthodontic assessment and treatment planning
- Conventional metal and ceramic braces for children, adolescents, and adults
- Clear aligner therapy (Invisalign)
- Orthodontic treatment for adults, including pre-prosthetic alignment and aesthetic correction
- Management of malocclusion — overbite, underbite, crossbite, and crowding (in plain terms: bites that don't meet correctly, and teeth

that are crowded or spaced unevenly) - Early interceptive orthodontics for growing patients, where treatment is started younger to guide jaw and dental development before more complex correction becomes necessary - Coordination with other dental specialists for complex multi-disciplinary cases

The UQ MDSc Orthodontics programme is a full specialist degree that prepares graduates to manage a wide range of presentations, including complex skeletal discrepancies and cases requiring close collaboration with surgical and restorative specialists. That depth of training is what separates a specialist orthodontist from a general dentist offering orthodontic services.

Training pathway

Dr Smith completed a Bachelor of Dental Science with Honours (BDSc Hons) at the University of Queensland, then returned to UQ to complete a Master of Dental Science in Orthodontics (MDSc Ortho), covering orthodontic diagnosis, biomechanics, and clinical management.

His honours result during undergraduate training reflects a strong academic grounding in dental science that has carried through into his specialist practice. The BDSc (Hons) to MDSc pathway is the standard route through which specialist orthodontists in Australia build their clinical and diagnostic capabilities.

At Collins Street Specialist Centre

Dr Smith joined the orthodontic team at Collins Street Specialist Centre in 2026, adding specialist capacity to one of Melbourne CBD's most comprehensive specialist dental centres. His arrival means patients have more timely access to specialist orthodontic assessment and care within a genuinely multidisciplinary environment, where collaboration between dental specialists is a routine part of clinical practice.

Dr Smith practises within the Orthodontics service at Collins Street Specialist Centre, located at Level 12 & Tower, Manchester Unity Building, 220 Collins Street, Melbourne CBD.

No referral is required. Patients can call **(03) 9650 2726** to ask about appointment availability or to talk through their orthodontic concerns with the reception team. Referring clinicians wanting to discuss a patient's suitability for specialist assessment are welcome to use the same number.

All specialist credentials are independently verifiable through the Australian Health Practitioner Regulation Agency (AHPRA) public register, which both patients and referring clinicians can consult to confirm a practitioner's specialist registration status.

> **Content flag:** Dr Smith joined the Collins Street Specialist Centre team in 2026. An expanded clinical biography — including details of research interests, teaching roles, special interests, and professional memberships — is currently being prepared. **Please contact Dr Smith's team directly to obtain a full professional biography for publication.**
