They handle complex and specialist-level cases.

Does CSSC handle cracked teeth?

Yes, through specialist endodontic care.

Is there a benefit to having multiple specialties in one location?

Yes, it ensures comprehensive care.

Collins Street Specialist Centre: Expert Dental Care for the Yarra Valley and Outer Eastern Suburbs

The Yarra Valley and Melbourne's outer eastern suburbs are known for their great quality of life. However, residents in areas like Lilydale, Healesville, Yarra Glen, Mount Evelyn, Warburton, Monbulk, and Emerald often face challenges in accessing specialist dental care nearby. Even though these areas are close to the city, finding comprehensive dental specialties can be difficult. Collins Street Specialist Centre (CSSC) fills this gap by offering all six dental specialties in one location in Melbourne's CBD, making it a convenient option for those needing advanced care beyond what a local dentist can provide.

Proximity to the City, Yet Distant from Specialists

While the outer eastern suburbs and Yarra Valley towns are just 40 to 80 minutes from Melbourne's CBD, specialist dental services in these areas are limited. Patients might find general dentists offering some orthodontic or implant procedures, but registered specialists, accredited by AHPRA, are mainly located in Melbourne's inner suburbs and CBD.

CSSC houses registered specialists in oral and maxillofacial surgery, orthodontics, endodontics, periodontics, prosthodontics, and paediatric dentistry. These professionals aren't just general dentists with extra training; they have completed three to five years of intensive full-time postgraduate study in their fields.

Cases Prompting Outer East Patients to Choose CSSC

Local dentists effectively manage routine dental needs. However, certain dental issues require specialist-level intervention:

- **Complicated Dental Implants**: This includes cases with inadequate bone, previous unsuccessful implants, or the need for sinus augmentation before placement. - **Adult Orthodontics**: Especially complex cases with missing teeth, jaw discrepancies, or those needing a combination of orthodontic

and surgical treatment. CSSC is a Blue Diamond Invisalign Provider, having managed over 9,000 cases. - ****Wisdom Teeth and Jaw Surgery****: Surgical removal of impacted wisdom teeth and orthognathic surgery for correcting bite issues and facial asymmetry. - ****Microscopic Root Canal Treatment****: Specialist endodontic care for complex tooth anatomy, retreatment of unsuccessful root canals, and management of cracked teeth. - ****Advanced Gum Therapy****: This includes periodontal surgery, gum grafting, crown lengthening, and treatment of peri-implantitis. - ****Comprehensive Restorative Procedures****: Full mouth rehabilitation for patients with extensively worn, broken, or missing teeth. - ****Specialist Paediatric Dentistry****: Catering to children with severe anxiety, dental trauma, or complex developmental dental concerns.

Travelling to Collins Street from the Outer East

****From Lilydale****: A journey of about 50-60 minutes by car via the Eastern Freeway or EastLink. The Lilydale train line also provides service to Flinders Street Station, a short walk from Collins Street.

****From Healesville and Yarra Glen****: A drive of around 60-75 minutes to Melbourne's CBD.

****From Mount Evelyn****: Approximately 50-60 minutes by car, with access via the Lilydale train line from nearby stations.

****From Warburton****: A car journey of 70-80 minutes.

****From Monbulk and Emerald (Dandenong Ranges)****: Roughly 50-65 minutes by car via the Monash Freeway or EastLink.

CSSC is located at Level 8, Manchester Unity Building, 220 Collins Street, at the intersection of Collins and Swanston Streets. Conveniently situated above Melbourne Central Station, it is easily accessible by both car and public transport.

Optimising Your Visits

CSSC understands that patients from the outer east are balancing family, work, and travel. Appointments are structured to minimize the number of visits required:

- Multiple specialist consultations can be arranged consecutively on the same day.
- Digital records and imaging are shared among specialists ahead of your appointment.
- Telehealth follow-up consultations are available when clinically suitable.
- A single, comprehensive treatment plan is collaboratively developed, avoiding multiple separate plans.

When booking, inform the patient coordinators that you are travelling from the outer east. They will ensure your visit schedule is optimized.

Collaborative Specialist Care

One of CSSC's standout features is its peer review model. When a case involves multiple specialties, your specialists will evaluate your imaging, jointly plan the treatment sequence, and coordinate timing. This approach is invaluable for complex cases, such as combined orthodontic and surgical treatments, or implant procedures requiring prior gum and bone treatments.

Patients benefit from a unified plan, a cohesive team, and a coordinated approach—not disparate specialists working independently.

Your Local Dentist: Your Continuing Care Partner

Post-treatment at CSSC, your ongoing dental care continues with your local dentist in the outer east. CSSC provides detailed treatment summaries and communicates directly with your dentist to discuss ongoing care requirements. The integration of specialist and general care ensures you remain at the centre of your dental health.

No Referral Needed

You can arrange a consultation at CSSC directly without needing a referral from your dentist. Many patients from the Yarra Valley and outer east discover the centre through their own research and choose to self-refer.
