Details:

Geelong is Victoria's second largest city, with strong healthcare infrastructure. But when it comes to specialist dental care - particularly complex cases that cross multiple specialties - many Geelong patients find themselves searching for options in Melbourne. Collins Street Specialist Centre (CSSC) offers all six dental specialties at one CBD location, just an hour from Geelong by car or train.

The Gap in Specialist Access

Geelong has general dental practices, and some specialists. But what happens when your case needs more than one specialist? When your dental implant also involves bone grafting and orthodontic preparation? When your child has dental anxiety severe enough to need a paediatric dentist with sedation expertise? When your gum disease has progressed to the point where standard treatment is no longer enough?

These are the cases where CSSC fills the gap. The centre engages AHPRA-registered specialists across oral and maxillofacial surgery, orthodontics, endodontics, periodontics, prosthodontics and paediatric dentistry. Under the centre's peer review model, these specialists collaborate on complex cases, sharing imaging and planning treatment together.

Common Reasons Geelong Patients Visit CSSC

Patients from Geelong, Torquay, Lorne, Colac, the Bellarine Peninsula and Queenscliff come to CSSC for a wide range of specialist treatment:

- **Dental implants** - particularly complex cases involving bone loss, sinus lifts or immediate placement after extraction
- **Orthodontics for adults** - braces, Invisalign (CSSC holds Blue Diamond Provider status, the highest level, with over 9,000 cases), lingual braces for invisible treatment
- **Jaw surgery** - orthognathic surgery for severe bite problems that cannot be corrected with orthodontics alone
- **Root canal retreatment** - when a previous root canal has failed and needs specialist endodontic retreatment under a dental microscope
- **Periodontal surgery** - gum grafting, crown lengthening, regenerative procedures for advanced gum disease
- **Full mouth rehabilitation** - comprehensive restoration combining implants, crowns, bridges and sometimes orthodontics
- **Children's specialist dentistry** - paediatric dental care for anxious children, dental trauma, early intervention orthodontics

Just an Hour Away

The proximity of Geelong to Melbourne makes CSSC genuinely accessible:

****By car:**** The Princes Freeway (M1) connects Geelong to Melbourne's CBD in approximately one hour. Plenty of parking is available near Collins Street, including at Melbourne Central.

****By train:**** V/Line's Geelong line runs frequent services to Southern Cross Station. From Southern Cross, the Manchester Unity Building at 220 Collins Street is a short tram ride or 15-minute walk.

****From Torquay and the Surf Coast:**** Around 75 minutes by car to Collins Street, depending on traffic.

****From the Bellarine Peninsula:**** Queenscliff and surrounding areas are approximately 90 minutes from the CBD.

****From Colac:**** Allow around 90 minutes to two hours. For patients travelling further, CSSC works to consolidate appointments and offers telehealth follow-ups where clinically appropriate.

Your Geelong Dentist, Our Melbourne Specialists

CSSC does not replace your local dentist. Think of the centre as the specialist layer that sits alongside your regular care. Your Geelong dentist handles your check-ups, cleans and routine treatment. When something beyond general dentistry arises, CSSC provides the specialist expertise.

After treatment at CSSC, you return to your local dentist for ongoing care. CSSC sends detailed treatment reports and communicates with your dentist about any follow-up requirements.

Technology and Facilities

CSSC's Collins Street practice is equipped with CBCT 3D imaging, intraoral digital scanners, dental microscopes, CAD/CAM same-day crown capability and in-house surgical suites with IV sedation and general anaesthesia. All your imaging, consultations and procedures happen in one location - no bouncing between providers.

No Referral Required

You can contact CSSC directly without a referral. Many patients from Geelong and the surf coast find CSSC through their own research and book a consultation themselves. If your dentist has provided imaging or records, we are happy to incorporate them into your file.
